PROJECTS

TalentIQ - Coding Practice Platform | [GitHub](#) | [Live](#)

Feb' 26

- Architected a full-stack technical interview platform with 15+ features including a VSCode powered code editor, JWT authentication, real-time chat, and 1 on 1 video rooms with screen sharing and recording.
 - Engineered an isolated code execution engine with automated test-case evaluation, instant visual feedback (confetti on success, toast on failure), and a dedicated solo practice problems module.
 - Optimized server-state management using TanStack, reducing redundant API calls by ~40%, and maintained codebase quality across 3+ branches via Git/GitHub integrated with CodeRabbit AI for automated PR reviews.
- Tech Stack:** React, Node.js, Express.js, MongoDB, JWT, Tan Stack Query, Code Rabbit, Deployment

Nutrition Tracker | [Kotlin](#) | [GitHub](#)

Aug' 25

- Developed a comprehensive Android nutrition tracking app with customizable calorie/protein goals, real-time progress visualization, and quick-add functionality supporting seamless daily intake logging.
 - Implemented Shared Preferences for persistent data storage, custom progress bars with Material CardViews, long-press gesture support, and robust input validation ensuring smooth user experience across API levels 24-36.
 - Built a clean UI with View Binding, Activity lifecycle management, and Constraint Layout, reducing boilerplate code and improving rendering performance across 10+ Android device configurations.
- Tech Stack:** Kotlin, Android SDK (API 24-36), Material Components, Constraint Layout, View Binding

Fruit Selling Website | [GitHub](#) | [Live](#)

Oct' 24

- Created a multi-page fruit and vegetable e-commerce website using HTML, CSS, Bootstrap, and JS components, covering homepage, shop, product detail, cart, checkout, login, and contact modules.
 - Designed clean and interactive UI components including carousels, search modal, category filters, and product grids, enhancing visual structure and improving overall user navigation experience.
 - Structured product layouts, testimonials, and cart summaries to streamline the end-to-end shopping flow, integrating Owl Carousel, Lightbox, and Font Awesome for a polished, production-ready interface.
- Tech Stack:** HTML5, CSS3, Bootstrap 5, JavaScript (UI interactions), Font Awesome, Lightbox, Owl Carousel, Google Fonts

TRAINING

Personal Finance Management System | [GitHub](#) | [LinkedIn](#)

Jul' 25

- Orchestrated a Java Swing-based desktop finance application with 3 core modules Transactions, Budgets, and Reports integrating 6 real-time financial indicators to deliver a complete experience.
 - Configured a real-time dashboard tracking 6 key financial metrics with dynamic updates triggered after every transaction, enabling instant financial visibility.
 - Mastered robust transaction management handling 100+ entries with full CRUD operations and localized Indian Rupee (₹) currency formatting, improving financial data organization and readability by 60%.
- Tech Stack:** Java, Java Swing, AWT, OOP Design Patterns, File Handling
